Work Experience/ Start ups

Internship At MEVSUITES (May 2022 - June 2022)

➢ Description: Modern Database software suite to Collect, manage and automate database growth and information.

➢ Role: Frontend developer

➢ React, bootstrap

GitLand

➢ Description: A startup that connects employers and developers together. The employer puts up his project description,his requirements and available funds and we are in charge of finding a suitable developer via a clever matching algorithm that takes into account the developer's experience on the stack, his contribution to open source projects and several other factors. Also developers can earn rating points via contribution to open source   projects.

Naija Surveys

➢ Description: This project was born from the newly implemented means of identification in Nigeria, NIN. We aim to collate valuable data via allowing Nigerians to take surveys which are verified using NIN

Sunflower

➢ Description: Sunflower is a Decentralised Applicaton (DAPP) that allows people to donate money to NGO's, associations and charities.

➢ Technologies Used: Typescript, Vue js, web3 js, solidity
