Full Stack Developer || React . Nestjs . Golang

Skills

Languages:	Javascript/Typescript, Golang	**Databases:**	MongoDB, Postgres
Frameworks:	React, Nestjs, Nextjs, React-Native, Node, Gin		

Experience

React Developer Internship At Mevsuites (20th May - 25th July 2022)

Mevsuites is a modern database software suite to collect and manage information

- Our team was tasked with implementing a Bulk SMS service to allow users to send bulk sms to phone numbers in international format or from a CSV file

Role:

- I was a part of the **React** Frontend team
- Implemented UI **Figma** design to pixel perfect web pages
- Integrated **REST api** endpoints provided by the backend team
- Collaborated with the rest of the team via **github** and **trello**

Frontend Developer Contractor (2021-2022)

- Did some frontend jobs for various clients such as building a portfolio website or creating a landing page

Techs Used: React, HTML, CSS, Javascript

Certifications

- Responsive Web Design (Free code camp) - Certificate
- Javascript Algorithms and Data Structures - Certificate
- Frontend Development Libraries - Certificate

Personal Projects

Blognado - Full Stack Blogging application where users can read, write and comment on blogs

Techs Used:

- Reactjs   - Nextjs   - Nestjs   - MongoDB   -React Query   -Tailwindcss

What I Did:

- Build **RESTAPI** backend service with **NESTJS** providing endpoints for CRUD operations
- Build dynamic web pages with **NEXTJS** and **Tailwindcss**
- Build Image storing service using **google drive api** and **Nodejs**
- Manage data fetching and caching with **React Query**

Frontend github   **backend github**   **Live Site**

Lication - An android chat application entirely from scratch

Techs Used:
- React Native   - Golang   -Redux

What I Did:
- Build **RESTAPI** backend service with Golang's Gin Framework
- Store and retrieve data using **mongodb aggregation**
- Handle State Management and Data fetching and caching with **Redux Toolkit**

github

Multi Step Signup Form

Techs Used:
- Reactjs   - Redux   -React Spring

What I Did:
- State Management with **Redux**
- Manage Page Transitions with React Spring
